SUMMARY

Product-minded software engineer building accessible mobile experiences and reliable developer tooling.

EXPERIENCE

Northstar Labs

iOS Engineer

Jan 2022 - Present

San Francisco, CA

- Worked on onboarding flows for a mobile product serving 12,000 users.
- Built accessible SwiftUI components and reduced duplicated interface code by 18%.
- Helped with REST API integrations and release checks across the iOS team.

Orbit Systems

Software Developer

Jun 2020 - Dec 2021

Remote

- Developed Python tooling for weekly data validation and reporting.
- Maintained SQL queries used by product and operations teams.

PROJECTS

Release Notes Assistant

- Created a Swift command-line tool that prepares release notes from Git history.
